

Dictionary :

=> Rahul Janghu @ Google for any info.

=>

Apple	:	It is a fruit
Abode	:	Home
:	:	:
:	:	:
:	:	:

meaning of apple : It is a fruit .

∴ This dictionary is just a collection of
key and value pairs.

=> In real life dictionaries are ordered. :)

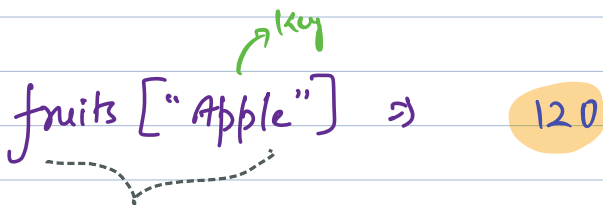

★ Dictionaries in Python :

⇒ In python version 3.7 & above it's **Ordered**.

⇒ In other python versions it is unordered.

⇒ **Ordered** : They are stored in a sequence in which the key & values are defined.

This **doesn't** support **indexing**.

⇒  fruits["Apple"] ⇒ 120
gives value at "Apple"

⇒ Apple	⇒ A red fruit
Apple	⇒ A black fruit

⇒ **Synonyms** : Two words with **same meaning**.
