Loops:

loops:
- while
- for ✓✓

★ Flow chart:

Start → initial process

Count = 0

decision box → if Count = 5

No → Heli. shot → Count +1 → Count +1

Yes

lesson taught

end

Syntax of a while loop:

```
count = 0           # intitializetn

while    condition :     # when should you run loop

        do something
        count += 1      # updetion
```
